Two Pyrethroid Actives	Aerothor contains two actives for both rapid knockdown and rapid kill of crawling insect pests in a safe and effective manner. Also provides residual protection.
Will not harm plants	Safe to use around plants or garden areas.
Low toxic	So you can use Aerothor in schools, kitchens, hospitals, domestic residences, offices, etc.
Rapidly metabolised in plants and animals	Making it safe for even the most sensitive environments.

## AEROTHOR PRODUCT DETAILS

Active Ingredient: 2g/kg cypermethrin, 1.4g/Kg imiprothrin.  
Insecticide Group: Pyrethroid.  
Formulation Type: Aerosol.  
Pests Controlled: Crawling insects including, cockroaches, silverfish, ants, carpet beetles, fleas, spiders, and clothes moths.

Aerothor is a pyrethroid insecticide. This means it is modelled on pyrethrum, a natural extract of the pyrethrum daisy. Aerothor was developed and formulated specifically for professional treatments.

## HOW TO USE (refer to product label for full details)

Shake can well before using. Keep can as upright as possible and hold about 15-20cm from the surface. Avoid using on plastic surfaces. Treating surface with Ensystem Extra Strength Crawling Insect Spray will kill and protect against a large range of crawling insects. For direct kill spray in the direction of the crawling insect.

- Cockroaches: Spray skirting boards, under cupboards, behind stoves and refrigerators, and other places where cockroaches live and hide.
- Silverfish: Spray architraves, bookshelves and other areas where paper is stored.
- Ants: Spray around garbage bins and food disposal areas and entry points.
- Carpet Beetles: Lightly spray under carpets, lounge chairs and along skirting boards.
- Fleas: Infested rooms should be closed and treated by thoroughly spraying the carpet. Ventilate the room 4 hours after use. Ensure adequate ventilation during use.
- Spiders: Spray where cobwebs appear.
- Clothes Moths: Spray storage areas and in emptied drawers and wardrobes.
