

ARE YOU USING AND RECOMMENDING TOMORROW'S TERMITE SOLUTION THAT'S ALREADY HERE?

FOR LIFE UNINTERRUPTED™

 **Altriset**[®]
Termiticide

syngenta[®]

Here is what some leading pest controllers who are experiencing success with ALTRISSET had to say about it.

“It’s our product of choice, it’s safer and very effective. Termite damage stops soon after treatment, but the termites die slowly, allowing for complete, unprecedented colony transfer. 80% of our customers go with ALTRISSET.”

NICK BENTLEY FROM FRONTLINE TERMITE AND PEST CONTROL,
YARRA VALLEY, VICTORIA.

“We only use termiticides that we have complete confidence in. Safety to our customers and employees is a key issue and company policy, ALTRISSET is a great fit due to the non-toxic label. Its mode of action ensures termites “stop feeding” in 2 to 4 hours, but live long enough for colony transfer to other nest-mates. ALTRISSET is an exceptional product.”

DAVID CLOAKE FROM SANDGATE PEST CONTROL,
BRIGHTON, QLD.

“ALTRISSET is our flagship product for termite control. It’s incredibly effective, but most of all it’s safer to our customers and our technicians.”

TOM BOSCHMA FROM SPECIALIST TERMITE CONTROL, MELBOURNE,
VICTORIA. (NATIONAL PEST MANAGER OF THE YEAR 2014 AND 2015)

Are you using ALTRISSET as your preferred termite treatment yet? Many of Australia's leading pest controllers have recognised the benefits of ALTRISSET and are growing their businesses with it as their preferred termite product. There are compelling reasons why you should be recommending ALTRISSET to your clients:

- ▶ ALTRISSET is the very latest in termite control chemical technology - combining unprecedented safety with incredibly effective termite killing power
- ▶ ALTRISSET is safer for you and your staff - it is exempt from poison scheduling and no PPE is required when applying it
- ▶ ALTRISSET has proven to be very effective with exceptional results achieved by pest controllers Australia wide
- ▶ ALTRISSET is very versatile - it can be used as a foam, direct treatment, barrier treatment or to complement or replace baiting
- ▶ ALTRISSET can add real value to your business with its unique combination of features

LATEST TECHNOLOGY

ALTRISSET represents the latest in liquid chemical termite control technology. No other product can match its incredible combination of safety, effectiveness and versatility. Progressive pest controllers all over Australia are seeing the significant advantages that ALTRISSET can provide their businesses.

Don't be left behind using older technology. Whilst older termite chemical treatments may still perform satisfactorily, ALTRISSET is the new standard when it comes to safety in combination with effectiveness.

UNPRECEDENTED SAFETY BUT VERY EFFECTIVE

ALTRISSET is safer for you but deadly to termites. The targeted, unique mode of action of ALTRISSET means it has very low toxicity to mammals, birds, earthworms and even honeybees. Only certain insect muscles are sensitive to and targeted by the active ingredient in ALTRISSET, chlorantraniliprole, which is what makes it a safer option.

ALTRISSET really is the new benchmark in safety in combination with very effective termite control.

ALTRISSET AND BAITS

While baits seem to be a safe alternative to many chemical treatments, they cannot match the unique combination of safety and efficacy of ALTRISSET. ALTRISSET has been successfully used in sites previously only deemed to be suitable for baiting such as childcare centres, healthcare facilities and even zoos.

It literally is tomorrow's termite solution that's already here.

ALTRISSET is tomorrow's termite control solution that is already here and waiting for you to take advantage of it. ALTRISSET is the product your customers want and is the product that can progress not just your business, but the entire pest control industry.

ONLY A TERMITICIDE AS ADVANCED AS ALTRISSET:

- ▶ Stops termites feeding within hours
- ▶ Kills 100% of directly and indirectly exposed termites within 14 days
- ▶ Provides superior transfer for colony control
- ▶ Has versatile application options to cover different situations – foam, direct treatment, barrier treatment and complement or replace baiting
- ▶ Protects homes for many years
- ▶ Is exempt from poison scheduling – no use of PPE required to apply it, customers not required to leave their homes
- ▶ Is safer for you, your customers, their families and pets but deadly to termites
